## CSC173 Formal Models and Computation Project 2 Submission Form

Complete this form using BlackBoard.	g a PDF viewer/reader, save it, and submit	t it with your code on
Last name:	First name:	
NetID:		
File containing your mai:	n function:	
Did you use "-std=c99	-Wall -Werror"?	
Check one: Yes No	l don't know	
Does your code have a c	clean report from valgrind?	
Check one: Yes No	l don't know	
Part 1		
Parse tree representation	n and functions (files, struct names, import	tant functions):
Recursive-descent parsi	ng functions:	
Function that starts a rec	cursive-descent parse:	

Continues on next page...

## Part 2

Parsing table representation and functions (files, struct names, main functions):

Function that creates the parsing table for your grammar of regular expressions:

Function that uses a parsing table to perform a table-driven parse:

## Part 3

Function that converts a parse tree into an expression (and perhaps turns it into an automaton and runs the automaton on user input):

Put any other comments in your README.txt (or README.pdf) file.
